
Discipline Groups

By having all three building design disciplines under one roof, Group Eight can provide clients with a sole responsibility approach to projects. As well, project co-ordination is more easily achieved with an integrated design team.

Electrical Engineering

The electrical department has had extensive experience in building design projects for commercial, institutional, industrial, warehousing, municipal and regional governments. Group Eight has knowledgeable personnel who are committed to a quality service focus.

A sampling of our comprehensive list of electrical design capabilities includes:

- power supply
- power distribution
- grounding
- transformers
- substations
- co-generation
- UPS systems
- energy management
- exterior lighting
- interior lighting
- sports lighting
- fire and security systems
- communication systems
- building automation
- instrumentation
- PLC & DCS systems
- hazardous area classification
