# Discipline Groups

---

Since 1974, Group Eight Engineering has provided clients from both the public and private sector with comprehensive engineering services. The discipline design teams, working under one roof, provide practical solutions meeting our clients' needs.

## Mechanical Engineering

Our mechanical department has built a reputation for mechanical system designs that provide comfortable, energy efficient and healthy interior environments. This has become increasingly important to clients, whether their project is improving an existing facility or constructing a new facility. Our extensive experience has been developed on numerous industrial, commercial, institutional and municipal projects.

Our expertise includes:

- automated building control systems
- fire protection
- plumbing
- HVAC systems
- heat recovery
- central chilled water
- co-generation
- cool water storage
- refrigeration/ice plants
- boiler plants
- medical gas systems
- building assessment
