
Discipline Groups

Throughout the years, Group Eight has been committed to meeting the needs of clients by providing innovative designs as practical solutions. We offer comprehensive structural, mechanical and electrical engineering services to our clients. The discipline groups are staffed with experienced people who are committed to quality of service.

Structural Engineering

The structural department has extensive experience in steel framing, reinforced concrete, load-bearing masonry, timber and aluminum structures. Typical structural designs include space frames, supports for heavy equipment and earthquake-resistant designs, portable buildings, bridges, parking structures, cranes, deep foundations and unusual structures. Group Eight has a broad range of clients in both the public and private sectors.

The following list identifies various types of projects in which our structural department has been involved:

- hospitals
- nursing homes
- health clinics
- city halls
- arenas
- aquatic facilities
- elementary schools
- secondary schools
- colleges
- universities
- manufacturing facilities
- warehouses
- industrial plants
- offices
- churches
- parking complexes
- industrial process structures
- structural restorations
